

Choral Ped Final Lesson Plan

Wellesley Kerr 84667617

Objective

1. Given a demonstration of performing simple rhythmic patterns and guided practice in speaking and clapping rhythmic exercises using Gordon's beat function rhythm syllable system, the student will demonstrate the ability to sight-read rhythmic passages consisting of eighth, sixteenth notes and *ties* as assessed by reading and performing the rhythm of mm. 9-16 for Soprano II, Alto, and Bass in *O Sapo* using Gordon's beat syllable system at the tempo of quarter note = 72 BPM in small groups of three, making no more than 1 error in rhythm to receive a "satisfactory" or "A" grade.
2. Given a lecture and vocal modeling of singing diatonic scale melodies using Kodaly method for sight-singing, students will demonstrate the ability to sight-read diatonic melodies using solfege with simple rhythms as assessed by sight reading and performing mm. 9-16 for Soprano II, Alto, and Bass in *O Sapo* at the tempo of quarter note = 72 BPM in small groups of three, making no more than 1 error in pitch or solfege syllable evaluated by the teacher (Pass/Fail)

Equipment and Resources

Recording of *O Sapo*

Choral Sheet music for *O Sapo*

White board (to introduce rhythmic and notational exercises for specific passages)

Rehearsal Plan

Anticipatory Set

1. The teacher claps basic beat patterns consisting of half, quarter, eighth notes and rests and has the students replicate the rhythmic patterns.
2. Students take turns individually sight reading, clapping, and speaking additional notated rhythms involving half, quarter, eighth notes and rests and have the students replicate the rhythmic patterns.
3. The teacher provides the pitch for "do" (scale degree 1), and the students sing in response to changing Kodaly hand gestures.

Introduction of the subject to be learned

"Today, we are going to focus again on sight reading and speaking rhythms with half, quarter, eighth, and sixteenth notes and rests using Du te de te, and we are also going to introduce a new rhythmic device called a tie. We are also going to keep practicing the Kodaly hand gestures for solfege syllables, and applying them in our piece, *O Sapo*."

Modeling (Objective 1)

Students will start with sight clapping and speaking a series of progressive rhythmic passages notated on the chalkboard or whiteboard, each exercise will gradually increase in difficulty, starting with simple quarter notes and eighth notes, into more advanced passages consisting of sixteenth notes and ties.

*supplementary rhythmic sight-reading exercises used in this section is attached at the bottom of the file

Guided Practice (Objective 1)

The students will speak and clap the rhythmic exercises provided above as a class with the teacher monitoring for correctness. The final exercise will consist of rhythms drawn from mm.9-16 of *O Sapo*

Modeling (Objective 2)

The students will be provided with a series of diatonic sight-singing passages, featuring predominantly intervals of the melody of O Sapo. They will be asked to sight-sing these using the correct solfege syllables and each exercise will progressively increase in difficulty.

Guided Practice (Objective 2)

Students will sing pitches in solfege from “O Sapo” with correct rhythm. If this is unsuccessful, students may sing the solfege without regard to rhythm (everything could be sung in 8th notes). The teacher monitors and corrects issues if necessary. Once this can be successfully executed, the students will be asked to sight-sing the melody in mm. 9-16 of O Sapo, using correct solfege syllables and correct rhythm.

Independent Practice

Students will be given around 2 minutes to practice singing the passage on their own, with the correct pitch, solfege, and rhythm. They are also encouraged to help one another or form groups to practice together. The teacher will go around the classroom to go through difficult sections with students independently if needed.

Closure

The class sings mm. 9-16 of *O Sapo* using correct pitch, solfege, and rhythm and the teacher evaluates the students.

Formal Assessment

By the end of the lesson, every student should be able to:

Clap and/or speak the rhythm and sing the correct pitches of mm. 9-16 for Soprano II, Alto, and Bass voices in *O Sapo*, which includes eighth notes, sixteenth notes, and ties at the tempo of quarter note = 72 BPM with less than 1 error in rhythm, pitch, or solfege in order to receive a “satisfactory” or “A” grade.
